

### DAY 3 from Wales

Dear Parents and Carers,

Another fully packed day behind us!

We woke up early again to feed the goats and check if the little twins arrived yet. The farmers told us that the mummy goat was whinging a lot which is a sign that the twins are ready to be born soon, although nothing happened yet.

After breakfast we met the horses and the donkeys and took the donkey for a lovely walk. We cleaned their stables and gave them fresh water.

In the meantime, the other group took a long walk while checking the sheep. The farm has around 3000 sheep all over the fields. We had to make sure that otters or badgers didn't attack the baby lambs during the night. We found many badger holes on the ground but luckily all the lambs were safe and sound. On the way back we took a different route along the coast and listened to the farmer's interesting stories about the surrounding islands. Suddenly he spotted a seal in the water!! We were very lucky to witness the seal diving and jumping right in front of us in his natural environment.

We had an early lunch today as we had to get ready for another coastal walk. We stopped halfway through for a lovely ice cream and continued our walk. We enjoyed the hiking and the amazing view from the cliff. Finally, we reached the beach where the children collected lots of pebbles and shells and took lots of pictures in the beautiful sunny weather. Awaiting for us on our arrival, there was a delicious Sunday Roast and fruit salad which was perfect after a 6.5 km walk! Tomorrow morning we will say good bye to Miss Martina and looking forward to another day on the farm.
