

DAY 6:

Dear Parents/Careers

We have had another amazing day on the farm, the children are so use to the farm now that the farmers decided to add a few new tasks to their daily routine. These consisted of digging out thistles from a large field, weighing the animals, leading the animals to new fields and filling in holes on the road heading in and out of the farm. The children raised to the challenged and completed the tasks which amazed the farmers even more. Dan, the farm manager, said he has never seen a London school adapted to the farm so quickly.

The main activity today consisted of children cooking their own lunch from scratch which happened to be pizza. They followed the instructions to the letter and even offered to help the cooks clean up after. While the pizzas were cooking, the children decided to make a thank you card for all the meals that have been made for them during the week.

The weather has been so lovely today which allowed the children to spend most of their free time playing kick rounders and stuck in the mud outside. Tomorrow the children will be performing their final farm tasks for the week, followed by a visit to the beach which everyone is looking forward to.
